SANIYA SHAIKH

B.E. Data Science | AI / ML Engineer

India | +91 9284102122 | saniyashaikh6052@gmail.com

LinkedIn | GitHub | Umargam, Valsad, Gujarat | Open to Relocation

EDUCATION

St. John College of Engineering and Management 2023 - 2027

B.E. Computer Science and Engineering (Data Science) CGPA: 8.5/10

TECHNICAL SKILLS

Programming & Databases: Python, SQL, FastAPI, Streamlit, Git, GitHub

Data Science & Analytics: Data Analysis, Data Cleaning, Data Preprocessing, Data Validation, Data Transformation, Exploratory Data Analysis (EDA), Pandas, NumPy, Matplotlib, Seaborn, Feature Engineering, Model Evaluation

Machine Learning & AI: Machine Learning, Scikit-learn, XGBoost, Regression, Classification, Deep Learning, PyTorch, TensorFlow, Neural Networks, NLP, Generative AI, LLMs, RAG, Embeddings, Semantic Search, Prompt Engineering, Model Deployment, Vector Databases, LlamaIndex, Ollama

Business Intelligence & Tools: Power BI, Dashboard Development, KPI Reporting, Advanced Excel, Pivot Tables, VLOOKUP, XLOOKUP, Power Query, Jupyter Notebooks, VS Code

Professional & Soft Skills: Problem Solving, Analytical Thinking, Critical Thinking, Time Management, Teamwork & Collaboration, Professional & Verbal Communication, Presentation, Adaptability, Learning Agility, Attention to Detail, Client Interaction

EXPERIENCE

Data Analyst Intern – Helllo Uniglobe Pvt. Ltd. May 2026 – June 2026

- Cleaned, transformed, and analyzed business datasets using Python, Pandas, NumPy, and SQL.
- Performed exploratory data analysis (EDA) to identify trends, patterns, and actionable business insights.
- Developed data preprocessing, validation, analysis, and visualization workflows to support data-driven requirements.

ML Intern – Testriq QA Nov 2024 – Dec 2024

- Built predictive models for concrete material strength prediction using Machine Learning techniques.
- Applied feature engineering, data preprocessing, and model evaluation to improve prediction accuracy and model stability.

PROJECTS

DocMind AI: LLMOps-Based Document Intelligence System *Python | LlamaIndex | Ollama | Streamlit*

- Retrieval-Augmented Generation system for document question answering, built with Streamlit, LlamaIndex and Ollama (qwen2.5:0.5b, nomic-embed-text), running fully locally.
- Implemented hybrid retrieval and evidence-floor abstention (the system declines to answer when evidence is weak); evaluated with a 43-test harness.
- Authored review and experimental research papers on the system.

Knowledge Forge – AI Knowledge / Retrieval Application *LLMs | RAG | Embeddings | Semantic Search*

- Developed an AI knowledge application using LLMs, embeddings, semantic retrieval, and contextual response workflows.
- Designed a retrieval workflow to transform source information into usable knowledge for AI-assisted querying.

Insurance Prediction API *Python | Scikit-learn | XGBoost | FastAPI | Streamlit*

- Developed an end-to-end machine learning prediction system covering preprocessing, feature engineering, model training, evaluation, and prediction; compared models using performance metrics.
- Exposed the trained model through a FastAPI REST API and built an interactive Streamlit interface for users to interact with the prediction system.

CiviShare – Civic Issue Reporting & Community Platform *CIVIHACK | GitHub*

- Developed a solution focused on civic issue reporting and community engagement during CIVIHACK.
- Designed workflows for collecting, organizing, and presenting civic issue information; contributed to development, testing, and presentation.

RESEARCH

- Experimental Evaluation of DocMind AI: Hybrid Retrieval, Evidence-Floor Abstention, and Resource-Aware Local RAG – experimental paper (manuscript).
- Privacy-Preserving Hybrid Retrieval-Augmented Generation for Local Document Intelligence: A Systematic Review and Design Requirements for DocMind AI – review paper (manuscript).

CERTIFICATIONS

- Cinute Digital (Industry Oriented): Machine Learning; Data Analytics with Power BI; Prompt Engineering.
- Blessed IT Solution and Million Minds (Industry Oriented): Applied Machine Learning using Python.
- LinkedIn Learning: Machine Learning with Python: Foundations; Python for Data Engineering: from Beginner to Advanced; Introduction to Data Science; Supervised Learning Essential Training.

ACHIEVEMENTS

- 3rd Prize – Tech Prix Hackathon for developing and presenting a technology-based solution.
- CIVIHACK Participant & Developer – contributed to the CiviShare civic technology project.
